LumenChoice® Type C LED Tube and Driver System

Convert your existing linear fluorescent fixture to LED lighting without needing a comprehensive reinstall. LED tubes are ideal for those seeking high energy savings with minimal installation time.

Current's LumenChoice® Type C system utilizes one LED tube to create multiple lumen options via the wattage of the selected LED driver. See reverse for LED tubes and driver product details.

Current offers two driver platforms:

- 1) **Regular Drivers**-choose the desired fixed-wattage option based on the desired lumen output, i.e. 12W, 15W, 21W. Available in Dimming and Non-Dimming.
- 2) **LumenChoice® Drivers**-adjust the wattage/lumen level on the driver, in the field i.e. toggle from 9W, 12W, 16W. This option simplifies bill of materials and inventory even further, and allows for making on-the-fly wattage/lumen adjustments at the point of installation. Low Watt drivers (LW) and High watt drivers (HW) come pre-set at 12W and 21W respectively and can easily be adjusted pre or post installation. All LumenChoice Drivers are 0-10V dimming also, allowing for even more control over lumen output and efficiency.
